Profile Summary

Computer Science Engineering graduate with hands-on experience in Frontend Development, AI chatbot solutions, and full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building responsive UIs, API Integration, implementing JWT authentication, and deploying real-time applications with Socket.io on cloud platforms. Strong foundation in Git-based workflows and clean, scalable code.

Technical Skills

Frontend: React.js, JavaScript (ES6+), Redux, HTML5, CSS3, Tailwind CSS, Next.js (Basics)

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io

Database: MongoDB, Mongoose, SQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Docker (Basics), Render, Vercel

Chatbot & Automation: Libromi, Picky Assist, Conversational Flow Design

Languages: JavaScript, Python, Java, C

Experience

Frontend Developer & AI Chatbot Intern

VASS Systems LLP (May 2026 – Aug 2026)

- Developed and enhanced frontend features for the company's flagship project, Temple Address, using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS, contributing 10+ reusable UI components.
- Implemented responsive UI components and resolved 15+ frontend issues, Debugging, Performance Optimization, Cross-Browser Compatibility and cross-device consistency.
- Integrated RESTful APIs and collaborated with backend developers to deliver seamless end-to-end functionality.
- Built and maintained AI chatbot workflows using Libromi and Picky Assist, designing conversational flows for FAQs and service-related inquiries.
- Participated in testing, debugging, deployment, and Git-based development workflows within an Agile team.

MERN Stack Developer Trainee

Bloombiz Creatives (2025 – 2026)

- Developed full-stack web applications using the MERN stack, covering client-side and server-side development.
- Built secure authentication systems using JWT and role-based access control (RBAC) for multi-user platforms.
- Integrated RESTful APIs, implemented complete CRUD functionality, and designed MongoDB database schemas.
- Deployed and tested applications on Render/Vercel, following industry-standard development and Git practices.

Projects

AI Learning Platform – AI-Powered Study Assistant

Live — GitHub

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Gemini API

- Built and optimized an AI-powered learning platform using the MERN stack, implementing SEO strategies to improve search visibility, discoverability, and website performance.
- Integrated the Gemini API to enable PDF-based learning, AI-powered topic explanations and QA, quiz generation, flashcards, and study notes.

Real-Time Chat Application

Live — GitHub

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Cloudinary

- Developed a real-time chat application using the MERN stack and Socket.io, supporting instant messaging with minimal latency.
- Implemented JWT authentication, live online status tracking, typing indicators, and Cloudinary-based image sharing.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2021 – 2025

College of Engineering Vadakara (CEV)

Higher Secondary Education

2018 – 2020

NGO Quarters Higher Secondary School

High School Education

2018

GVHSS for Girls, Nadakkavu

Certifications

• **Computer Network and Internet Protocol -NPTEL**

jan 2024 - Apr 2024

• **Line Follower Robot -Vyuha'22 workshop**

oct 2022
